Wilderness first aid scenarios pdf

Help. He will likely be unstable and will need support walking down the mountain; You might have to move him or build a stretcher with logs and a T-shirt Apply pressure until the bleeding is stopped. If the bloodsucker absorbs through the bandage, do not delete Distance from the pool. 4. If the child is unconscious, start the infant CPR. 5. Even if the child is revived, call 9-1-1 and describe the status and your location. Scenario No. 9 in day camp with Boy Scouts and Cub Scouts, a Webelos scout is working on his Totin chip and ends up cutting himself on his arm. (Yes, he's clumsy.) The boy is panicking and bleeding severely. What do you do? How to handle status: Call 1.9-1-1 and describe the position and your location. 2. Contact the victim carefully and try to calm him down. 3. Put on nonlex gloves and eye protection if you have them. With clean clothes or sterile dressings, use the palm of your hand to apply firm pressure directly above the wound. 4 If the pad is soaked with blood, do not remove it. Instead, place a new pad on top of the old one. 5. If you have elastic bandage, use it to secure the pads tightly on the wound. When the bleeding stops, continue to hold the pad firmly until help comes in. Landscape No. 10 On a backpacking trip, you come to a small cave. From the inside you hear someone crying for help. You can see an injured person inside the cave who is trapped and appears unable to move. He says he is dehydrated and has his shoulders dislocated. What do you do? How to handle status: Call 1.9-1-1 and describe the position and your location. 2. Before entering the cave, look at the scene carefully. Are there any other dangers? Are there other people there? Contact the victim carefully. 3. Keep the victim calm. Take him small sips of water. 4. If possible, put the man's arm in a sling. Make sure the victim is safe from other hazards, such as falling rocks. 5. Check the victim for other injuries and keep him calm until help arrives. coming.
